

Workshops

Our quality = your safety ... Share it !

**Modular workshops
online or on-site**

Duration: 30 minutes to 8h : modular according to your needs

Where? Online, in your offices, in our Training Center

Interactive and modular:

The different workshops proposed by CODIPRO will give you the opportunity to get the maximum of the possibilities and services offered by CODIPRO and LIFTEUROP.

During the workshops, the participants will discover the commercial strategy of our companies, the industries to be targeted, the extent of the range and many other topics while developing their technical knowledge related to the brands CODIPRO and LIFTEUROP.

These workshops, which last between 15 minutes and one hour, are interactive and will give the participants the opportunity to intervene, interact with the trainer or even discuss the challenges encountered in their markets.

We also hope to develop during these meetings, whether they are online or on-site, a little more the commercial and relational links which unite our companies.

In order to optimize these workshops, a discussion will be held beforehand to better target the needs and thus modulate the presentations. If required, CODIPRO can provide a training diploma or a certificate of participation.

Whether online, at your premises or in our Training Center, you will always find a workshop that fits your location and timing.

AVAILABLE WORKSHOPS

ONLINE - ON-SITE

*How can we help you?
