Design Draftsman in the Industrial Engineering Office

CODIPRO
WILTZ, LUXEMBOURG

Phone: +352 81 92 81-286
Email: fannet@codipro.net

We are looking for a meticulous and independent design draftsman to join our engineering office. This role requires technical expertise in the lifting industry, proficiency in Inventor software, and fluency in English.

Responsibilities:

- 3D and 2D design and drafting of mechanical parts and assemblies.
- Cost estimation and project management.
- Design of specific products and preparation of technical documentation.
- Management of manufacturing drawing libraries.
- Updating infrastructure plans and creating diagrams for marketing purposes.
- Supplier orders and follow-up for specific client projects.
- Quality control of mechanical parts and assemblies (receiving and shipping).
- Occasional visits to clients and suppliers.

Qualifications:

- Holder of a BAC +2 or BAC +3 degree with a technical focus
- Proficiency in Autodesk Inventor 3D or equivalent CAD software
- Knowledge of material resistance
- Ability to read and create technical drawings
- Mechanical dimensioning
- Proficiency in French. Basic English is mandatory, professional English would be an advantage. Other languages are a plus.
- Clear and effective verbal communication
- Digital skills (internet search engines, Outlook, Excel)
- Minimum of two years' prior experience in a design office (product or process), with an understanding of processes and requirements
- Effective resolution of technical problems
- Good organizational skills to manage documents and projects
- Ability to collaborate effectively with team members and stakeholders
- Flexibility and ability to adapt to changes and new technologies
- Precision and attention to detail in creating drawings and models

We offer:

- An international and dynamic work environment.
- Opportunities for professional development.
- An attractive salary package.
- Modern work tools and continuous training.

Contract type:

Permanent contract -
Full time
